

The Making of Modern Law:

Landmark Records and Briefs of the U.S. Courts of Appeals, Part I: 1950–1980 and Part II: 1891–1950

DISCOVER PREVIOUSLY INACCESSIBLE LOWER COURT RECORDS THAT ADDRESS SIGNIFICANT HISTORICAL ISSUES

Expanding the depth and breadth of Gale's exhaustive legal primary source materials, *The Making of Modern Law: Landmark Records and Briefs of the U.S. Courts of Appeals* comprises the two latest collections of the renowned *Making of Modern Law* series. Established in 1891, federal appellate courts, called the United States Courts of Appeals, sit just below the United States Supreme Court, and their documents are equally valuable records that provide trial history, depositions, transcripts, and arguments. Combined, these collections offer complete digital access to almost 90 years of critical legal doctrine to support legal research and scholarship, serving not only students and scholars of legal history but also researchers across the humanities and social sciences, from sociology, economics, and political science to literature, philosophy, and religion.

ACCESS CRITICAL INSIGHTS INTO LEGAL ARGUMENTS AND BEYOND

Our 24-hour news cycle serves up a dizzying array of breaking stories on immigration, harassment and discrimination, constitutional law, environmental policy, insider trading, and more. *The Making of Modern Law: Landmark Records and Briefs of the U.S. Courts of Appeals, Parts I and II* provide records that enrich contemporary legal issues with their backgrounds and precedents.

DISAPPEARING BRIEFS—NEVER-BEFORE-DIGITIZED RECORDS BROUGHT TO LIGHT
